

Gideon Performance Tracks

The Gideon Tracks Project is an incredible collection of performance tracks of songs from the old hymn books and old song books produced and recorded in the finest fashion using the highest quality musicians, arrangers, producers, engineers and studios. These tracks have been recorded in friendly keys that work great for church choirs, soloist, vocal groups and background music.

We have selected some of the most popular songs from this era and produced them with a rich full sound especially arranged to accompany vocals. We currently have over seventy song titles to choose from and they may be purchased individually or as collections for live performance accompaniment or licensed for recording.

These tracks work especially well in churches that want to sing the old songs but don't have the musician base in the congregation to create the full band sound that helps these songs fill services with the spirit we've all grown to love through the years.

Gideon tracks also work great with vocalists wanting to record a CD. In fact, artists report their recordings with these tracks become some of their most successful recordings, even over custom produced projects. License fees for recording Gideon Tracks are very modest.
